

## CEL-MET™ BOPP 15µm METALLIZED POLYPROPYLENE FILM

## Typical Values Metal One Side, Heat Sealable Other Side

A metallized co-extruded bi-axially oriented polypropylene with the following features:

- \_ Wide seal range
- \_ Good hot tack
- \_ Excellent web flatness
- \_ Superior metal adhesion and resistance to "crazing" from extrusion lamination
- \_ Outstanding light and moisture barrier

|----------------------|------------------------|-------------|--------------------------------|
| Properties           | Typical Value          | Units       | Test Method                    |
| Yield                | 73,7                   | m²/kg       |                                |
| Thickness            | 15                     | μm          |                                |
| Tensile Strength     | 117,2 MD<br>206,8 TD   | N/mm²       | ASTM D882                      |
| Tensile Modulus      | 1723,7 MD<br>3102,6 TD | N/mm²       | ASTM D882                      |
| Elongation           | 190 MD<br>70 TD        | %           | ASTM D882                      |
| Optical Density      | 2,1                    | Macbeth     | CMP OD-1                       |
| Light Transmission   | < 1,0                  | %           |                                |
| Shrinkage (Air oven) | < 5 MD<br><3 TD        | %           | 5 min, 130 ºC                  |
| Heat Seal Range      | 105-150                | ōС          | 0.5 s/ 30 psi                  |
| WVTR                 | < 0,5                  | g/m²/24 hr  | ASTM E-398<br>(37,8ºC, 90% RH) |
| OTR                  | < 65                   | cc/m²/24 hr | ASTM D-3985<br>(23ºC, 50% RH)  |

The polypropylene side is in compliance with the regulation FDA 21 CFR 177.1520 (c) (1.1) and (3.1)

The metallized side is FDA approved for indirect food contact.
