

DURAMET™

Metallized and Top-Coated High Barrier Polyester

DURAMET™ - a bi-axially oriented polyester film exhibiting excellent gas barrier with a **moisture protected metal layer** and a bright foil appearance.

Consistent handling properties, heat stability and slip, as well as high tensile strength for easy lamination.

Typical Barrier Values

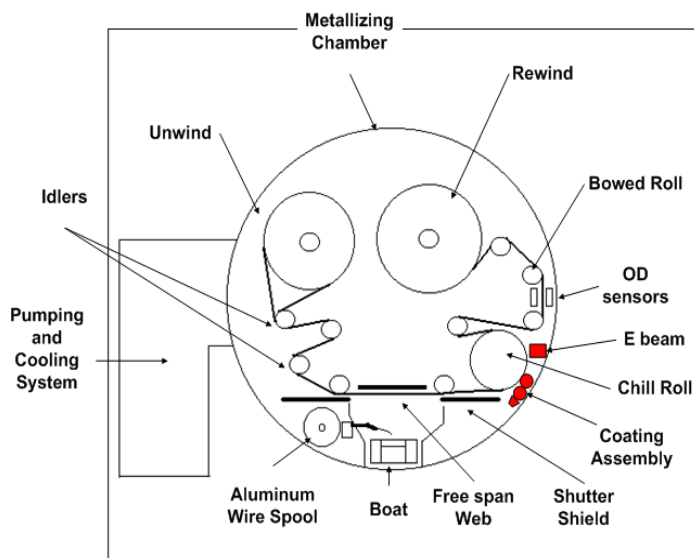

Oxygen barrier - 0.01 cc/100in²/24 hr.

Moisture barrier - 0.01 g/100in²/24 hr.

Metal Adhesion - > 600g/in

For use in packaging for food and industrial or commercial non-food packing where high moisture is present.
