

DURAMET®

Metallized & Top-coated High Barrier Films

A New Level of Barrier

DURAMET® - a bi-axially oriented polyester film exhibiting excellent gas barrier with a moisture protected metal layer and a bright foil appearance.

Consistent handling properties, heat stability and slip, as well as high tensile strength for easy lamination.

Typical Barrier Values of DURAMET® Polyester

Oxygen Barrier < 0.01 cc/100in²/24 hr.

Moisture Barrier < 0.01 g/100in²/24 hr.

Metal Adhesion > 600g/in
